

# AFRICA INLAND MISSION

SHORT TERM TEAM OPPORTUNITIES 2019

# FARM QUEST

## An Introduction to Sustainable Agriculture

This is an opportunity for those who want to learn how they can reach unreached people groups by sharing the gospel in an agricultural context. Participants will be taught the main principles of Conservation Agriculture & Transformational Development through practical demonstrations and classroom teachings. Hear how Basotho farmers' lives have been transformed and spend time with the resident Basotho students. This quest is suited to both those who have farming experience and those who want to develop their existing ministry through the use of agriculture.
