

Construction & Logistical Support

God has opened exciting doors for outreach in the nation of South Sudan, but the work there is challenging and often very remote. As a Construction and Logistical Support person, you'll help make this work possible, working to build or arrange for team housing, coordinating the purchase, transport, and delivery of supplies and materials, and working with local builders as needed to complete the job. Looking for a Can Do Problem Solver with a heart for missions and a love for people.
